PROJECT GUIDELINES:

The aim of the Project is to give an opportunity to students to learn independently and show that they can identify, define and analyze problems or issues and integrate knowledge in a business context. It reflects the ability of a student to understand and apply the theory, the concepts and the tools of analysis to a specific situation.

1. The project is a practical, in-depth study of a problem, issue, opportunity, technique or procedure or a combination of these aspects of business. The students are required to define an area of investigation, carve out research design, gather relevant data, analyze the data, draw conclusions and make recommendations. **The project must be an original piece of work that will be undertaken in post-graduate study, over a period of two semesters.**
2. The topic is to be selected carefully with the help of supervisor.
3. All the material that relates to your project, including completed questionnaires or tapes from interviews, should be shown to your supervisor and be kept until the examination board has confirmed your results. Do not throw this material away once your project is submitted, as you might be asked to present it as part of the Viva Voce Examination, before your project results are confirmed.
4. The supervisor's role is to appraise ideas and work of the student. Student must take overall responsibility for both the content of project and its management. This includes selection of an appropriate subject area (with the approval of the supervisor), setting up meetings with the supervisor, devising and keeping to a work schedule (to include contingency planning), and providing the supervisor with samples of your work.
5. The project reports would be examined by the external examiner and based on the report and Viva Voce examination conducted at the end of IV semester, a student will be awarded marks.
6. The External Examiners will examine the following in Project Report:
 - a) Literature Survey on the Topic Chosen.
 - b) Method of Data Collection.
 - c) Presentation – Style, Comprehensiveness, Table presentation, Graphs, Charts.
 - d) Analysis and inference and implication of the study.
 - e) Overall linkage between objectives, methodology, findings and suggestions.
 - f) Bibliography and References.
